PRELIMINARY AMENDMENT

Please amend the above-identified application as follows:

AUG 1 9 2002

Technology Center 2600

IN THE CLAIMS

Cancel claims 1-32, without prejudice in favor of new claims 33-67.

Add claims 33 to 67 as follows:

33. (New) A telemetry system comprising:

a plurality of transmitters, each of which is for transmitting intermittently and at various transmission frequencies: (a) routine transmissions, at first time intervals, and (b) urgent transmissions, in response to urgency, at transmission opportunities at second time intervals; wherein each of said plurality of transmitters is for transmitting independently of any receiver for receiving any of said transmissions and independently of any of said plurality of transmitters, and

a receiver for holding, simultaneously for each of said plurality of transmitters, data indicative of an expected time and an expected frequency of at least one future transmission opportunity.
